

It's the **ecology** stupid!

These words introduced a [Presentation to the Kimberley Fire Institute, May 2020](#).

Time has since marched on. Blue skies, but also days with smoke-filled skies, a reasonable wet season (2020/2021), more blue skies and also more smoke ...

The beautiful and rugged Kimberly remains a net exporter of carbon and soil.

Yet as I hang up my spurs, it pleases me to note that the Kimberley is well positioned to become a world leader in climatebuilding (new word) and the rebuilding of natural wealth!

November 2021 WA State Government flagged exciting opportunities:

1992 – 2005 with support from family and others I was able to write into the landscape a story that matches my testimony of 2021.

What took place on the ground from 2006 onwards only poorly reflects ongoing learning. Time will tell how much of that story will remain transcribed on and in the landscape. As always, **relationships** and **management** remain **key**!

For the benefit of those who might wish to take advantage of our mistakes, insights and learning, it is my hope that content accessible via the following two links will be of assistance to you.
